

A Biome is made up of areas with similar climate and communities of organisms. For this project, you will be making a Diorama (a 3 dimensional model in a shoebox) of a biome. Draw or glue pictures of the background of your biome on the inside parts of the shoebox. The shoebox will stand on one side, so the bottom of the box will be your main background. Cut out or draw plants, animals, and other organisms found in that biome. Paste those pictures on cardboard and you can stand them on the side part of the box. You can also use string to hang some from the top.

You must include the following for the _____ biome:

- | | |
|--|--|
| <input type="checkbox"/> Name of your Biome | <input type="checkbox"/> 1 labeled carnivore/secondary or tertiary consumer |
| <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> 3 Abiotic features (terrestrial biomes need a climatogram with precipitation and temperature, soil type, salinity, amount of light, etc.) | <input type="checkbox"/> 1 labeled decomposer/saprovore |
| <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> 3 autotrophs (labeled with names) | <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> 4 energy transfers between organisms |
| <input type="checkbox"/> 1 labeled heterotroph | <input type="checkbox"/> map of where your biome is located |
| <input type="checkbox"/> 1 labeled herbivore/primary consumer | <input type="checkbox"/> <input type="checkbox"/> 2 ways humans have harmed this habitat |
| <input type="checkbox"/> 1 labeled omnivore | <input type="checkbox"/> Make sure it is neat and creative |
| | EXTRA CREDIT: examples of mutualism, commensalisms, or parasitism. |

Annotated bibliography on the back: use the MLA style to correctly cite **three** sources on the back of this paper. After each citation, give a review for each source - What areas are covered/not covered? Are concepts clearly defined? How useful is this source? How reliable is this source? Would you recommend this source to someone else?
