

Global Warming

Earth...
We treat you like our own garbage can,
Little did we know, you had your own plan.
Global warming is what's it's called,
And scientists were definitely appalled.
Years by years, and you'll get hotter,
Eventually, we might never see another otter.
Fortunately, there is a solution,
That will stop all of this nasty pollution.
Recycling is the best, it is clearly what I suggest.
Every single day, we should do this,
And see our Earth being it's best.
In a long time, we will look back and reminisce,
But if we do not realize that things we do,
Our time on Earth will eventually be way past due.
We all love the natural beauty,
And to preserve that is our duty.
