

Ethical Decision Making Framework

1. State the ethical question(s) raised by the case.	2. List all of the relevant facts.
3. Identify the stake holders (people and/or entities that will be affected by the decision) and their primary concerns.	4. Identify the values that play a role in this issue.
5. List several possible solutions. (What <i>could</i> you do?)	
6. Choose the solution you think is best and <i>justify</i> your choice.
